Modules

- **Viewing Appointments**
  - **Equivalence classes**
    -

No appointments	"You don't have any appointments!" message should appear in place of actual appointments
1 appointment	"You don't have any appointments!" message should **NOT** appear, and should instead say "You have an upcoming appointment", along with details about the appointment

- **Viewing Workouts**
  - **Equivalence classes**
    -

No workouts	"You Don't Have Any Workouts!" message should appear in place of a workout list
1 or more workouts	"You Don't Have Any Workouts!" message should **NOT** appear and should be replaced with the list of assigned workouts

For viewing appointments, we tested by adding appointment objects into the database, linked to a trainer, and creating client objects to see if we could view the appointment objects inside the Android app. We did something similar when we were testing viewing workouts.
