Working Prototype Known Problems Report - Android
FitTrak
Trainers
11/30/2019

- In the "View Available Trainers" activity, if the Trainer's bio is too long, it overlaps with the "Sign Up With This Trainer" button. For possible solutions, we can try to rearrange the layout components so they don't overlap with each other.
- In the "View Workouts" activity, if the user is in the activity and doesn't have any workouts assigned, but is assigned one while they are still in the activity, the "You Don't Have Any Workouts!" message is still visible. This message goes away when the activity is refreshed. For possible solutions, we can try adding a boolean or if statement to make the message not visible in these cases.
